

INTERNATIONAL CONFERENCE ON ADVANCES IN GEOTECHNICAL ENGINEERING 2011

7-9 NOVEMBER 2011 PERTH, AUSTRALIA

The International Conference on Advances in Geotechnical Engineering (ICAGE 2011) is an inaugural international conference that aims to bring together academics and practitioners from across the world with a common interest in the field of Geotechnical Engineering.

The conference will provide a platform to discuss the recent advancements and address the future challenges within the profession of Geotechnical Engineering. It will be an excellent opportunity for exchange of information and ideas pertaining to the profession. Both academics and engineers are cordially invited to attend the conference to share and exchange their knowledge.

VENUE

The Conference will be held in the Perth Convention Exhibition Centre, between the 7th and 9th November 2011.

The Centre is centrally located in the heart of the city and is nestled between the majestic Swan River and the Central Business District. The Centre boasts breathtaking views from the Centre's 300 metre long, floor-to-ceiling glass foyer, across all three levels, providing city and Swan River views.

ABOUT PERTH

Western Australia's capital city Perth, is renowned for its fresh, clean and unpolluted environment, its relaxed outdoor lifestyle and its Mediterranean climate. Above all else, it is the people of Perth and Western Australia who are our greatest asset. Perth was voted the 'World's Friendliest City' by readers of the US Leisure and Travel magazine in 2002 but don't take their word for it, come and visit and see for yourself.

With a state that spans more than 2.5 million square kilometres it is possible to sunbathe on a beach somewhere in the state 365 days of the year.

CONFERENCE THEMES

The conference will consider papers in, but not limited to, the following topics:

- Material characterization (soil, rock, geosynthetics)
- Site investigations and in-situ testing and monitoring
- Foundations and pavements
- Geotechnics for transportation and infrastructure
- Ground improvement and soil stabilization
- Landslides and slope stability
- Anchored structures (soil and rock anchors)
- Computational and physical modelling
- Geoenvironmental Engineering
- Soil dynamics and geotechnical earthquake engineering
- Case histories and practical examples
