

Advanced Geomechanics

- **Geotechnical Civil Engineers**
- **Engineering Geologists**

Advanced Geomechanics (“AG”) is a well established, privately owned, Perth-based geotechnical consultancy that has successfully focussed on scoping and interpretation of offshore investigations and foundation/anchor design for the oil and gas industry. From this solid foundation, and with recent developments within our team, we are seeking to diversify into the onshore Civil-Geotechnical sector.

In order to grow our Civil-Geotech capability, AG is seeking to recruit a number of geotechnical engineers and engineering geologists at engineer to senior-principal engineer levels. In particular, we will recruit team members with an interest and enthusiasm for delivering solutions to clients in the Civil-Geotech sector of the construction industry, and have the skills and aspirations to be part of a growing team. The work undertaken will include analysis, design and documentation of Civil-Geotech solutions, value engineering, review and supervision of construction. Energy, positive attitude and enthusiasm are essential and, while directly relevant experience is important, it is not necessarily essential as significant support, training and mentoring can be provided within the team structure. Our current integrated team of around 30 professionals comprises engineers, engineering geologists and geophysicists, working in the areas of offshore and near-shore site investigations, geotechnical design, geophysical interpretation and geohazard assessment. The intention is that personnel in the Civil-Geotech team will work collaboratively and interchangeably with the established offshore geotechnical team.

We will consider all talented, experienced and aspiring geoscience professionals that can see themselves as part of the AG team. Proven experience in the field of Civil-Geotech design will of course be viewed favourably. Recent graduates with a strong academic background and an interest in career development in this area are also encouraged to apply.

If you think that you could be part of the AG team, want interesting and rewarding work in a pleasant environment, we would very much like to hear from you.

Please contact **Marc Woodward** (0448 328 050) for further discussions in relation to these opportunities. Alternatively, please send your details to: marcw@ag.com.au or feel free to phone us on 9389 5033 if you would like to find out more.
