

PRINCIPAL LEVEL GEOTECHNICAL ENGINEER

SYDNEY

Our client has one of the largest geotechnical teams in Australia

There are a world renowned international consulting firm.

They have consistently been voted "One of the Best Firms to work for in Australia" .

Their Sydney ground engineering team houses some of the industry's leading expertise.

Our client's roots lie in the field of geotechnical engineering and they have an outstanding reputation in this field. Thus, you will also be able to enjoy the opportunity to work on major projects using the most technically advanced methods.

To apply for this senior level position you will need to have at least 15 years geotechnical experience and be able to demonstrate solid experience in some or all of the following areas;

Geotechnical investigations.

Geotechnical interpretation and reporting.

Development of Geotechnical and Geological models, analysis and design

Applicants with solid experience in some of the following areas will also be highly regarded;

Foundations, structures, retaining walls, soft soils, reclamation projects, soil structure interaction, slope stability, remediation design and construction practice.

This position seeks a senior level geotechnical engineer who is interested in becoming the "Technical Lead" for my clients team. If you are keen to manage projects and major clients without the administration of people management then this role will provide opportunity for you to do this.

Our client has a flat structure and is employee owned offering opportunities for ownership

Appropriate Visas, relocation and airfares provided for the successful overseas applicants.
